Model shown: FE-DIAMOND-P-M

Inspired by stained glass, the Diamond collection features modern fixtures with dramatic facets made of acrylic panels in a metal frame. The opal white acrylic creates a warm glow and hides the internal lamping. The custom canopy features a raised, faceted design detail to continue the motif.

With both masculine and feminine influences, the transitional Botanic lighting collection by Feiss is a study in contrast. The spun metal drum captures the richness of an antique patina with natural variations. Then, elevating the piece is a dynamic Clear Pressed glass diffuser with a subtle floral gesture, which is then highly polished to generate breathtaking sparkle for a wholly modern look.

Pendant is Duo-Mount/  
Semi-Flush convertible

# ADONIS, & STEWART

Adonis has clear, water glass surrounding another opal etched glass and a soft, clean relaxed country design makes this distinctive double glass treatment a unique pendant with its warm Dark Cherry finish. A classic hanging pendant, Stewart is simple lighting done right. The clear glass bowl maximises light output and is available in a Western Bronze finish.

# HINKLEY

Gemma is a contemporary chandelier collection with stunning rectangular prisms of amber pearl and clear crystal set within a frame of Vintage Bronze or Silver Leaf to create a seamless sparkling jewelry-like effect.

Sabina features an airy, linked geometric form in a glistening Silver Leaf finish with a distressed gold varnish. An eggshell silk shade provides an elegant backdrop to the pattern while subtly masking the light source.

# BLUFFTON & KATERINA

The Bluffton 3 light pendant has an industrial inner shade that gives a dark ambient light when used with Edison style lamps. The Katerina is truly a work of art, with two architectural arms securing a crystal-like glass and a cleverly concealed light source, for an ultimately sophisticated design. Features a sleek backplate.

HATHAWAY  
& LANZA

Hathaway's striking design features a bold etched glass shade held in place by three intersecting, floating arms with unique shaped uprights and ring detail for a modern style.

Lanza makes a chic statement with its strong, rectangular metal work. The geometric detailing is softened with linen shades and acrylic lenses for sophisticated, modern appeal.

# FLY & LEMURIA

The LED Fly is a delicate flush, finished in an unusual Black/Silver & Gold effect detail. The 6 light flush fitting is supplied with opaque flower glass and LED G9 Lamps, excellent for low ceiling situations. The Lemuria uses the classic Grecian key motif in a rich Distressed Gold finish. Ivory White linen shades and opal diffusers are used to create a soft warm light.

# KITCHEN

The use of decorative light fittings in the kitchen has become a common choice as part of the overall design. This collection shows our most commonly chosen models used in kitchen spaces, breakfast bars and serving areas, most of which are transitional and vintage based styles. They are also often used in bars and restaurants as the majority of pendants are height adjustable to maximise versatility.

The Parkman pendants featuring classic detailing taken to a modern scale. The largest option is an over-sized silhouette sure to make a dramatic statement. Harking back to period-inspired, warehouse lighting, the Cadence collection is a contemporary update to historic industrial fixtures. The riveted centre band, as well as the vented top and square linked chain on the pendants add rich, visual interest yet don't distract from the clean lines of the overall silhouette.

Model shown: FE-HUNSLOW-P-BS

The unique, elongated dome shade is just the beginning of the design details featured in the Hounslow collection. The Mercury glass is created by a silver leaf technique to produce a true silver Mercury glass. The Harrow wall light has a sleek modern frame in a polished nickel finish and clear seeded glass. The Tabby is a modern update to a classic pendant. The spun socket cup adds an extra special detail in the transition from the glass shade to the base.

# BATHROOM

This stylish range of products has been specifically designed for use in the bathroom environment, although they can also be used elsewhere within the home. Offering a choice of both classic and transitional designs, these fittings will add style and elegance to any bathroom setting. All of these products are IP44 rated, which is the water ingress rating required in many countries for bathroom lighting, making them suitable for Zones 2 and 3. G9 LED lamps are supplied with all fittings listed with G9 lamp holders.

Enzo is inspired by a romantic lantern design. Blending beauty and durability, the intricately die-cast aluminium construction features graceful scrolls with Old World allure while the rich Autumn finish and clear seeded glass for timeless elegance. Made of Solid Brass, Bingham's traditional style recalls a turn-of-the-century gas light reproduction. The vintage look is nautical in nature and recognises Hinkley's origins on the shores of Lake Erie. The brass construction features clear seeded glass and a Sienna finish, while candelabra lamping completes the authentic style.

# AGNER & KASPER

The robust cast aluminium Agner offers a 2 way or 4 way directional light version allowing for a stylish look on buildings when lit. Multiple fittings when placed close together can give a dramatic appearance. The products are powder coated in Graphite and have hidden screws to add to their clean lines. Kasper is an LED wall spotlight made from die-cast aluminium and finished in a Graphite polyester powder coating, with polycarbonate lenses to protect the lamp housings. Their hooded designs make them ideal for use in dark sky locations, where there is a need to reduce light pollution, as well as provide plentiful ambient light. IP54 rated

This elegant reproduction Georgian outdoor lantern is manufactured by hand from fine solid brass material. Designed to emulate the lanterns seen around London in the Early 1900s.

The Frida flush-mount is characterised by bold bars of die-cast aluminium painted with a Graphite finish, which disguise the light source and cast unique shadows on their surroundings. Each fitting features a polycarbonate lens. Bruges is a simple and modern lantern, constructed from Grade 304 Stainless Steel. It is lacquered, but will age if not maintained.

Influenced by simple barn lamps of the early 1900's, the classic Somerton lantern is hand made in solid brass and given an Antique Nickel finish for durability. Cage accessory available if required.

The Sheldon is influenced by simple barn lamps of the early 1900's, with a slight industrial edge. It is hand made in solid brass and lacquered for durability. The antique nickel finish will naturally age into a rich patina and a matching glass guard cage accessory is available if required.

BATON  
ROUGE

Every home can use a little extra curb appeal - that's where this ornate Baton Rouge lantern collection comes in. Gold lustre tinted glass and a warm Walnut finish enhance the intricate detailing beautifully. Each piece has a curvaceous form and perfect silhouette so it looks as dazzling in the daytime as it will when lit at night.

# LANDSCAPE

The **Garden Zone Collect & Connect** system is incredibly simple and safe to use, allowing up to 12 fittings to be connected together over a distance of 30m. With a comprehensive selection of fittings, you will find the ideal solution for any landscaping requirement. These fittings are guaranteed for 5 years against structural failure and the LED modules are guaranteed for 2 years.

## The bright way to light up your garden!

The Garden Zone Collect & Connect low voltage, energy saving lighting system is a great way to add style to any garden landscape. The system uses high power LED lights offering excellent light output with exceptionally low energy consumption. A wide selection of stylish light fittings including ambient, spot and deck lighting options are available. In such case, a Starter Kit can be purchased with the option of adding additional fittings if required.

### PLEASE NOTE

Garden Zone Collect & Connect cannot be mixed with the Garden Zone Professional range.

#### 6M CABLE

6 meter cable with 5 connecting point for Collect & Connect fittings

**Product Code:** GZCC/6M CABLE

# GardenZone

## PROFESSIONAL COLLECTION

### LANDSCAPE AND GARDEN LIGHTING

The Garden Zone Professional Collection offers a versatile selection of high quality, easy to install and energy efficient products for all parts of the garden landscape, designed for use by professional gardeners, landscapers and architects.

Using our excellent low voltage plug & go system allows a large number of fittings from the Garden Zone ranges to be connected together over a distance of up to 80 metres. Furthermore, all the fittings within the plug & go series use LED light sources, which have very good light output properties alongside exceptionally low energy consumption. Added to this we offer a complementary range of 240V energy efficient models in matching designs as well as range accessories to ensure the widest possible choice.

### PLUG & GO: HOW IT WORKS

plug  
& go

**Step 1:** Choose the areas you want to have lit, then we suggest that you sketch a rough plan view of each area involved.

**Step 2:** Choose the fittings which will suit the requirements and list them out with the quantity of each where relevant. Be careful to bear in mind the voltage of the fittings chosen. All 240V fittings will need mains supply to wherever they are to be installed whereas all plug & go models just need to be connected into the low voltage cable (as shown right).

**Step 3:** Measure the distance involved for the plug & go models chosen and determine, from the cable set options available which cable set or sets will be needed. Remember, up to 80 metres of cable can be used from 1 LED driver but the wattage loading must not exceed the recommended minimum, maximum (see accessories page 221).

**Step 4:** Plan where the mains supply will originate from. With the plug & go system you have a choice of placing the LED driver/drivers in an IP rated wall box on an exterior wall. However, depending on how large an area is involved, sometimes more than one mains feed may be needed in different locations. Consultation with an electrician is advisable on this matter.

#### Important

The Garden Zone Plug & go fittings use a unique single pin, 2 pole plug and as such are not compatible with any other product or system. Currently they are not dimmable but they will work when wired via a timer.

## Guarantee / Life Expectancy

All Garden Zone fittings are guaranteed against structural failure for 5 years and 2 years for the LED units. The LED lamps have a minimum life expectancy at 80% plus efficiency for 20,000 hours. Typically if on 4 hours per day, 365 days per year, than this equates to around 14 years of life. The 2 year Guarantee is only valid when exclusively using Garden Zone cables, fittings and drivers.

## Repair Service

Outside of the 2 year Guarantee we offer a chargeable full maintenance and repair service to fittings. This is conducted in our own workshops and the service includes replacement material parts and wiring repairs.

## GZ/DRIVER 11W

11W (min. load 3W, max. load 11W)

140mm long x 25mm wide IP66

## GZ/DRIVER 28W

28W (min. load 9W, max. load 28W)

200mm long x 30mm wide IP66

Drivers are supplied with 30cm of cable. Each fitting is supplied with 1.5m of cable.

## IMPORTANT:

All fittings should be plugged in prior to switching power on.

## GZ/Cable set-6M

Cable set for plug & go fittings 6 metres long with 5 plugs spaced 1 metre apart for up to 5 fittings

## GZ/Cable set-10M

Cable set for plug & go fittings 10 metres long with 9 plugs spaced 1 metre apart for up to 9 fittings

## GZ/Cable set-16M

Cable set for plug & go fittings 16 metres long with 15 plugs spaced 1 metre apart for up to 15 fittings

It is not often that one can find products made to original styles and to original quality levels like in the old days. Our Bronze family is our premium range of products that we believe achieves this. They are manufactured from heavy cast bronze (except models Bronze9 and Bronze20 which are produced from solid natural copper)\* and chemically treated to give a natural looking Aged Bronze or Verdigris finish .\*\*

All of these classic designs are supplied with our 12V plug & go system using high power LED's making them energy efficient, yet easy to use and install.

# TECHNICAL ADVICE & INFORMATION

---

## PRODUCT WARRANTIES/GUARANTEES

**GENERAL 2 YEAR GUARANTEE.** All fittings supplied from this catalogue, both interior and exterior, have a manufacturer's minimum guarantee of 2 years. This means that in normal and fair service, (and without incorrect or inappropriate installation or location), any product sold by Elstead Lighting or its partners should have no fault develop within a minimum of 2 years from purchase. Any fault that is found is covered by guarantee to be repaired or replaced at the suppliers cost, within this period.

All Elstead warranties/guarantees do not cover out of pocket expenses or consequential costs.

**LIMITED LIFETIME WARRANTY** - This warranty relates to certain ranges/models shown in this catalogue which are produced of materials that have an exceptionally long life expectation, such as solid brass lanterns. These fittings may age over time, but will not deteriorate to an extent where they will no longer function for the purpose intended. The "Limited" element relates to component parts such as rubber seals, lamp-holders etc. which are repairable but are not covered by the Lifetime warranty.

**15 YEAR WARRANTY AGAINST STRUCTURAL FAILURE** - Those models listed as having a 15 year warranty are guaranteed, that from purchase to within 15 years of normal use, the fittings will not deteriorate to any extent where they experience any structural failure. There may be signs of aging, corrosion or paint fading, but the integrity of the construction of these fittings means they will not deteriorate to any extent where they are rendered unusable within a lifetime of 15 years.

**2, 3, 5, AND 10 YEAR ANTI-CORROSION GUARANTEES** - Many outdoor fittings have anti-corrosion guarantees stated on each relevant page. This guarantee relates to the corrosion of paintwork on cast aluminium or steel fittings, and excludes locations within 5 miles of the coastline. Fittings that have been damaged, repainted or cleaned with an aggressive cleaner may be excluded.

Prior to agreeing to replace any fittings, the company reserves the right for the original seller or a representative of the company to inspect the damaged parts and for photographic evidence to be supplied.

**COASTAL COLLECTION 20 YEAR GUARANTEE** - These fittings are designed to be placed in the toughest of conditions including right by the coastline without exclusion. This guarantee covers protection of the finish against corrosion or UV degradation.

**COASTAL COLLECTION 5 YEAR ANTI-CORROSION GUARANTEE** - This guarantee relates to the corrosion of paintwork on composite parts. In the instance that fittings have been damaged, repainted or cleaned with an aggressive cleaner they may be excluded from the entitlement to a replacement. Prior to agreeing to replace any fittings, the company reserves the right for the original seller or a representative of the company to inspect the damaged parts and for photographic evidence to be supplied.

**LED MODULE AND PIR SENSOR GUARANTEES** - Within this catalogue there are a number of products incorporating PIR sensors or LED modules. Whilst the fittings themselves may have varying physical guarantees against corrosion, these electronic parts are covered by a 2 year guarantee against failure. After this period, they are still repairable and serviceable, either by the company or local supplier.

## GENERAL NOTES

**1. FINISHES.** Many of the finishes used on these ranges are hand applied (patinated) and some small variations and irregularities in the finish are to be expected. This is part of the process of manufacture and, far from being a problem, it is an important part of the nature of hand made and hand finished items.

**2. LAMP-HOLDER TYPES.** Most fittings are constructed with either E14 lamp-holders (small Edison screw, sometimes referred to as SES or with E27 lamp-holders (standard Edison screw, sometimes referred to as ES. Appropriate E14 and E27 lamps are widely available in a range of styles, wattages and lights sources including incandescent, compact fluorescent and LED. Some of these lamp-holders are now supplied with threaded skirts, together with candle tubes and shade rings. This means that these products can be used either as a fitting with candle tubes and candle lamps, or with glass using the shade ring. Additionally we make certain fittings which use G9 and GX53 lamps. Lamps are usually supplied with these fittings.

**3. WATTAGES.** Most fittings shown in the catalogue are shown with Maximum Wattage recommendations. These recommendations are calculated mainly by heat capability, as there is a correlation between heat and wattage. However, in many countries traditional incandescent lamps, such as 100W GLS are no longer available. There are now many new versions of lamps in the market, lower wattage but similar light performance such as halogen replacement, compact fluorescent and LED. Most fittings wattage capacity and certification has been based on the criteria using an Incandescent lamp and so when choosing lamps, please take care to ensure that wattages specified are of no more than the equivalent original incandescent lamps. In the case of LED, the wattages are far lower, but some of these can still run very hot, not dissimilar to incandescent of much higher power.

**5. FLUSH CONVERT/DUAL MOUNT.** A few of the chain models are constructed so that they can be easily modified from a chain fitting into a semi-flush fitting. Note that once converted to semi-flush it is not then possible to easily convert back to a chain fitting, as some re-wiring is likely to be required.

**6. CUSTOMISATION.** Some of our ranges supplied in matt black can be relatively easily patinated into finishes such as Black/Gold, Black/Copper etc. Equally, for chain suspended fittings that need extra chain and cable, these can also be relatively easily undertaken. Both such modifications may incur longer lead times and will have small additional costs added to the price. (See current Elstead Terms and Conditions.). Beyond this, with appropriate lead time and client budget, more specialised changes can be undertaken such as different colours completely, changes to dimensions and design modifications and even fully bespoke fittings can be considered due to our varied manufacturing resources available.

## EXTERIOR FITTINGS

**1. INSTALLATION CARE AND MAINTENANCE.** When installing all outdoor lights it is recommended to lightly grease all threaded parts and screws / nuts to ensure that fittings can easily be disassembled for cleaning or lamp replacement. When handling certain fittings / finishes such as polished copper they can easily finger mark, so it is recommended that bare hands on these surfaces is kept to a minimum. Please retain receipt and installation instructions for future reference.

**2. FINISH MAINTENANCE.** Many of our fittings are supplied in a natural finish, i.e. Polished Copper un-lacquered and Teak wood. These fittings

can naturally age over time or to maintain their original appearance, treatment is needed, such as oil for teak, beeswax for brass and light oil for Copper and Stainless Steel. When handling finishes during maintenance, small marks may show which can be easily polished away if required. The alternative is to allow the material to age and weather naturally, which does no harm to the fitting. Additionally, when installing cast aluminium fittings, a light coating of beeswax or oil can give the finish extended life, especially when in coastal areas. For all models, we highly recommend that exterior fittings are cleaned once per year with fresh water and oiled or waxed to give longer service. Lenses and glasses also benefit from cleaning but take care with polycarbonate or acrylic as these materials can easily scratch if any abrasive cloth is used.

**3. IP RATINGS.** All exterior fittings have an IP (Ingress Protection) rating which is a declaration of how much protection any product has against the ingress of both water and dust / particles. The minimum rating for an outdoor luminaire exposed to rain should be IP23 and the maximum can be up to IP68 (this can vary in different countries) which means the fitting is submersible. Most of our fittings are IP44 or greater and some of the Landscape models are up to IP67 meaning they can be covered by water up to a depth of 150mm, such as in-ground lights. See table below for full classifications. Typically, the higher the numbers, the higher the performance.

## BATHROOMS

Some of the products featured in this catalogue state an IP rating such as IP44. The term IP stands for Ingress Protection and relates to the product's ability to protect electrical parts from ingress of moisture and water. In particular, this is relevant for products being used in Bathroom locations. For installation and compliance purposes, bathroom spaces have been divided up into zones 0 to 3 and this diagram shows how lighting in a Bathroom should be planned based on these zones.

1st Digit	Short Description (Protection against ingress of solid bodies)	2nd Digit	Short Description (Protection against ingress of moisture)
0	Non-Protected	0	Non-protected
1	Protected against solid objects greater than 50mm dia.	1	Protected against dripping water falling vertically greater than 50mm diameter
2	Protected against solid objects greater than 12mm dia.	2	Protected against dripping water when the Luminaire is tilted up to 15° from its normal position
3	Protected against solid objects greater than 2.5mm dia.	3	Protected against spraying water falling on the Luminaire at any angle up to 60° from the vertical
4	Protected against solid objects greater than 1mm dia.	4	Protected against splashing water from any angle
5	Dust-protected	5	Protected against water jets from any direction
6	Dust-tight	6	Protected against powerful water jets
		7	Protected against immersion in water under defined conditions
		8	Protected against continuous submersion under manufacturers specified conditions
Example IP65 Dust-tight and protected against water jets from any direction.			

## COMPLIANCE/APPROVALS

All products within this catalogue conform with the European Union Low Voltage Directive, BS EN 60598-1:2008, the product standard for luminaires recognised across Europe and all fittings are CE marked. Every luminaire is individually tested by Elstead Lighting to ensure that the product is electrically sound and meets the company's quality standards. A unique test / batch number is then applied to the fitting. Please contact us for further details or advise us of your local needs.

We are manufacturing members of the UK Lighting Industry Association and conform to all aspects of the Lighting Industry Association Code of Practice for luminaire production.
